

05.C. Student Online Assessments

To view the updated help doc on managing student accounts click [here](#)

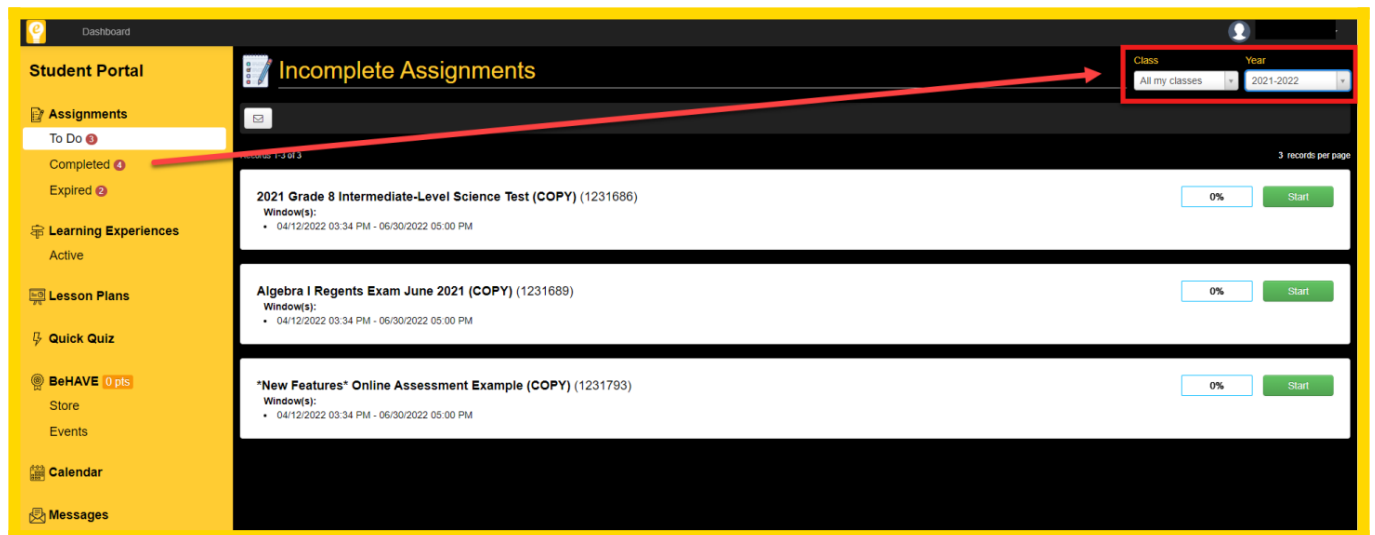

Helping Students Navigate PROGRess

Students will be logging into eDoctrina the same way that teachers log in, but will be navigated to eDoctrina's Student Portal (PROGRess) when they enter their login credentials properly.

The Assignments section has three relevant sub-sections: To Do, Completed, and Expired.

NOTE: If your students don't see "Expired" as an option please reach out to our Help Desk, as this is a setting that can be enabled or disabled per district.

The items that are displayed in these lists are dependent on the **Class filter** (which allows students to view "All my classes" or select a specific one) and the **Year filter** (which is defaulted to the current year).

Each section of the Student Portal provides the student the ability to communicate with their teacher using the eDoctrina email option. All users can access their eDoctrina mail by clicking the

mail icon .

NOTE: The results will ONLY be displayed if an assessment has been setup to make "Results Visible Online". This option can also be used to share assessment results for assessments taken via paper/pencil.

Taking an Online Assessment

eDoctrina offers many options to educators for creating online assessments. With this said, students may encounter different features depending on the specific assessment settings that have been selected for each assessment. Some features can be assigned [per question](#) while others can be assigned to the [entire test](#).

If an assessment has been set up to "Lock students to test", each time they access the assessment they will encounter a pop-up stating "This assessment is locked"

NOTE: To have this feature be more effective, a [Google Chrome extension](#) is available.

If the option to use the Safe Exam Browser was selected in the assessment, [Click Here](#) to see the Help Guide for setup/usage instructions.

If an assessment has been set up to have an "Online Time Limit", the student will receive a pop-up notification informing them that "This is a timed test" and stating how much of the allotted time is remaining.

The screenshot shows a 'Start assessment' pop-up window with a yellow border. Inside, the text reads: 'Start assessment', 'You may reopen this assessment.', 'After starting, you may pause and later resume this assessment, up until **04/16/2022 05:00 PM**', 'Please remember to click the "Submit" button when done so this assessment can be submitted for grading.', 'This assessment has a time limit.', 'Once you select START, you will have **30** minute(s) out of **30** minutes to complete this assessment.', 'You must click "Save and Finish Later" to stop the timer and resume this test later.', 'If you close the test without saving, the timer will continue to expire.', 'Good luck!'. At the bottom right are 'Go' and 'Cancel' buttons. A red callout box with white text says 'The remaining minutes will always display upon entering the assessment.' with a red arrow pointing to the '30' in the time limit text.

NOTE: This timer will begin as soon as the student clicks "Go" and will continue even if the student exits the assessment. Once the time has elapsed, the student will not be able to gain access unless the assessment is reassigned by the teacher.

If an assessment has been set up to have a "Password", the student will receive a pop-up window prompting them to "Please enter test password".

A yellow-bordered pop-up window titled "Start test" with a close button (X) in the top right corner. Inside, there is a red asterisk followed by the text "Please enter test password and good luck!". Below this is a white rectangular input field with a blue border. At the bottom right of the window are two buttons: an orange "Go" button and a grey "Cancel" button.

NOTE: This password is controlled and can be changed within the Assessment Editor. The most recent entered password will be the ONLY password that will allow access.

Below is a basic view student of what students will see when they begin their assessment. Some of the features displayed here are optional and are configured in the Assessment Editor. To learn more about configuration, please refer to our help guide on [Online Assessment Settings](#).

A screenshot of the eDoctrina assessment interface for an "Algebra I Regents Exam June 2021 (COPY)". The interface is divided into several sections. On the left, there is a sidebar with a timer showing "29:51" (labeled 1), buttons for "Submit" (labeled 2), "Save and finish later" (labeled 3), "Next unanswered question" (labeled 5), and "Go to question" (labeled 6). Below these is a grid of question numbers from 1 to 37. The main area displays the exam title and a question (labeled 9) about a kayak tour package. At the top right, there are icons for "Reading ruler", "Magnifier", and "Highlight mode" (labeled 7), and zoom controls (labeled 8). Navigation arrows are visible on the right side (labeled 4).

1. If the assessment has a time limit, it will display here.
2. Students should click **Submit** when they have completed the assessment. If selected, the student will not be able to re-open the assessment unless it is reassigned.
3. If the option to "Allow Re-Open" is selected in the online assessment settings, this button will appear allowing the students to close the assessment and complete their responses at a later time (if that time is within the available test window).
4. By default, students will be able to toggle between questions using the navigation arrows along the right and left sides of each question.
5. The "next unanswered question" button assists students in navigating through the online assessment. If clicked, eDoctrina will navigate the student to the next question in line that does not have an answer recorded. This invaluable button will change to blue once all questions have been answered.
6. It is possible to navigate directly to a specific question by selecting the the corresponding box in this section. These buttons are also be color coded to provide the student a better test taking experience.
7. The **Reading ruler**, **Magnifier** and **Highlight mode** are tools that are available by default.

8. The ability to **Zoom In/ Zoom Out** is available in case it is needed.
9. This area is where the assessment will appear. There are a few variations on how assessments are displayed. Displayed above is the page view when there is not a PDF uploaded and the questions have been individually entered.

When answering a multiple choice question, all the student needs to do is click the desired response and a checkmark will appear indicating the answer has been selected.

Has answer

Review later

6. How many angles does a dodecagon have?

☐ a. 9

☐ b. 10

☐ c. 11

☒ d. 12

If the online assessment setting has been selected to allow the students to eliminate answer choices, the student will see an "X" next to each choice. They can simply click it to eliminate that answer choice.

Has answer

6. How many angles does a dodecagon have?

☒ a. 9

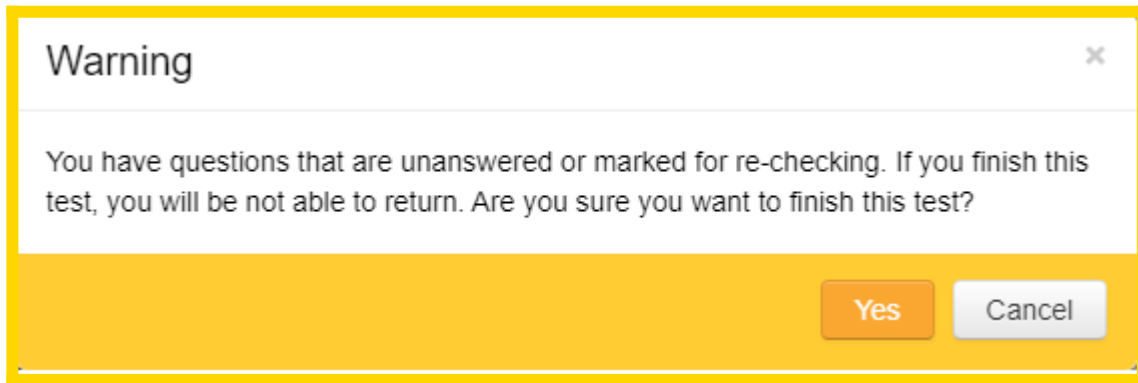

☒ b. 10

☒ c. 11

☒ d. 12

To ensure that students are aware that they have some unanswered questions on their assessment,

they will receive this message when they click on "Submit" test if there are any questions without a response.

Additionally, if a student's internet connection becomes interrupted a banner message will display at the top of their screen to notify them of the event:

For more information on setting up specific Online Assessment features, [Click Here](#).
