

Exporting Student SLO Scores

If there is data entered for the Student Population for any SLO, these values can be exported for one or many SLOs. This task is usually necessary if scores from an SLO need to be imported into another application, if they need to be saved in some local repository, or for some other reason. eDoctrina does not hold these scores for ransom!

The option to Export SLO scores is available for an individual Student Learning Objective or for many at once. This task is done from the Student Learning Objectives Homepage.

The screenshot shows the 'Student Learning Objectives' interface. At the top, there are buttons for 'Create', 'Copy', 'Merge', 'Print', 'Export SLO scores', and 'Export to Excel'. A red box highlights the 'Export SLO scores' button with the text 'Export scores for selected SLOs'. Below this, there are search filters for 'SLO #', 'School', 'School Year', 'Grade', 'Creator', 'Staff', 'Type', 'Status', 'HEDI Rating', 'Trash', and 'Department Code'. Another red box highlights the 'Export to Excel' button with the text 'Export scores for a single SLO'. The table below shows a list of SLOs with columns for 'ID', 'Name', 'Status', 'Interval', 'Subject', and 'Year'. The first three rows are highlighted in yellow.

ID	Name	Status	Interval	Subject	Year
247252	Edward Blackbeard School: Siesta Key High School Course(s): COURSE 2A (COURSE 2A) Type: Student Performance (REQSP+TREQSP)	DRAFT	Full Year	Mathematics	2019-2020
247274	Edward Blackbeard, Charlotte de Berry, Awilda Denmark Course(s): COURSE 2A (COURSE 2A) Type: State/Growth (3012C)	DRAFT		Mathematics	2019-2020
247275	Edward Blackbeard, Charlotte de Berry Course(s): COURSE 2A (COURSE 2A)	DRAFT		Mathematics	2019-2020

Once the export button is selected, the download of a Microsoft Excel file will initiate and will most likely be added to the downloads folder unless specified otherwise.

The screenshot shows a download notification bar. It says 'Student Learning Objectives is ready' and 'Your download should automatically begin in a few seconds, but if not, click [here](#).' Below this, there is a file icon and the name 'Student_Learni....xlsx'. A 'Show All' button is also visible.

The resulting file will contain all students linked to the selected SLOs with their respective Baseline Score, Target Score, Final Scores and whether the target was achieved. The student UID is also included in this export such that imports to other applications is very easy to do.
